Application/Control Number: 09/660,850

Art Unit: 2676

DETAILED ACTION

Claims 1-20 are pending in this application. Claims 1, 8, and 15 are independent claims.

The present title of the invention is "Error Distribution for the Approximation of the Pixel Color of a Digital Image".

Allowable Subject Matter

- 1. Claims 1-20 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

Prior art references do not anticipate or suggest the limitation "wherein the correction term for each pixel of each row of the digital image after a first pixel of each row is equal to the smallest error calculated upon approximation of only one preceding pixel" in combination with the other claim limitations in claim 1.

Prior art references do not anticipate or suggest the limitation "computing a sum of a correction term and a color code of the current pixel, the correction term being equal to an error value computed for a previous single one of the pixels multiplied by the selected weighting coefficient for the current pixel... wherein a correction term for each pixel of each row of the digital image after a first pixel of each row is also equal to only an error value computed for previous pixels multiplied by a selected weighting coefficient for a current pixel" in combination with the other claim limitations in claim 8.

Prior art references do not anticipate or suggest the limitation "for each of the pixels of the first group, selecting an estimated color of a plurality of estimated colors, the selected estimated color being selected based on the color of the pixel and the first correction coefficient; for each of the pixels of the second group, selecting an estimated color of the plurality of

estimated colors, the selected estimated color for the pixel being selected based on the color of

the pixel and the second correction coefficient, and obtaining a correction term, for each current

pixel of each row after the first pixel of each row, that is based on a computed error value of only

a single one of the pixels previous to the current pixel." in combination with the other claim

limitations in claim 15.

Any comments considered necessary by applicant must be submitted no later than the

payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for

Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Po-Wei (Dennis) Chen whose telephone number is (703) 305-

8365. The examiner can normally be reached on 9am-5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Matthew C Bella can be reached on (703) 308-6829. The fax phone number for the

organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 305-3900.
